RE: Request for Additional Information on Application to Appropriate
Water Number 41-3747 (A81080)

Dear Applicant:

At the conclusion of the water right hearing held on November 7, 2018, you were informed that additional information would be needed for the State Engineer to determine fully how this application meets the statutory criteria for an export application.

Please address the following:

1. Provide documentation that the State of Colorado has agreed with the applicant's assertion that depletion to the Colorado River System based upon this application will be counted as part of the State of Colorado's apportionment of the Upper Colorado River. Alternately, explain why it would be in the best interest of the State of Utah to approve this application to appropriate water before Colorado officials have first authorized or recognized their intent to include this use of water under their compact allocation.
2. Provide information you believe would give the State Engineer reason to believe water is available for appropriation both physically and consistent with the Colorado River Compacts at the proposed point of diversion considering flows for:
 - a. The recovery program for the endangered fish in the Upper Colorado River Basin;
 - b. Downstream existing perfected Utah water rights;
 - c. Downstream Utah approved applications to appropriate; and
 - d. Potential federal reserved water rights for Indian Tribes (including the Congressionally authorized settlement with the Ute Tribe), and

SCANNED RC

Subject: Request for Additional Information on Application to Appropriate
Water Number 41-3747 (A81080)

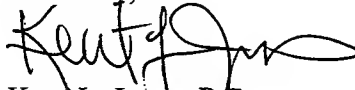

National Parks, Monuments and Recreation areas downstream of the proposed point of diversion.

This information is being requested since the state engineer has already established by policies adopted for this area a belief that the amount of water proposed under the application is not available for beneficial use as your application proposes.

3. Given that Utah Code Section 73-3a-108(2)(e) states the State Engineer shall consider alternate supply and sources of water available to the applicant in the state the applicant intends to use the water, explain why Utah should consider this application given that the Green River runs through Colorado.
4. Provide a detailed engineering cost-estimate to convey the water from the point of diversion to its planned place of use that demonstrates the project as proposed is physically and economically feasible.
5. Provide evidence that you have the financial ability to complete the project per Utah Code 73-3-11. Specifically, we are requiring you submit Articles of Incorporation, names of directors and officers, and the amount of authorized and paid-up capital. You are also invited to provide other financial information regarding your venture which would give a reason to believe you have the financial ability to complete the proposed works.
6. Provide evidence Water Horse Resources, LLC is authorized to conduct business within the State of Utah or alternately that the state engineer will not violate state statutes when taking action on this application considering your corporate status in Utah.

At the hearing it was indicated the applicant would be given 60-days from the date of this letter to provide this requested information. It was also stated that the other parties to this application would then be allowed 30-days to respond to the additional information submitted by the applicant.

Sincerely,

Kent L. Jones, P.E.
Utah State Engineer
